Ledieu and Hutton Bring 3 Pass Spiel Cups Home

Stewart's Rink of Macleod, Win Grand Aggregate With 12 Wins and 3 Losses; Ledieu Second With 10 Wins and 3 Losses.

The Grove Nest Pass bonspiel came to a conclusion on Friday after a closely matched struggle between all the teams. The 'spiel was played on the Bellevue artificial ice this year giving keen ice to all the contestants.

Besides capturing the Grand Aggregate, the Stewart rink won the G. Co. Inn Cup and the Bellevue Merchants cup but were pressed all the way by their opponents. Yukom of Claresholm took the Stewart rink to the 13th end, before surrendering the Grand Cos Inn cup and Bon ton of Coleman lost out to Stewart 10 to 8 in the Bellevue Mer-

chandise event.

Another consistent winner at bonspiels, Eddie Ledieu of Coleman was in rare form to win the Lethbridge Brownie cup from Masters of Claresholm 10 to 6 in the finals and also took home the Trixie Wood cup after defeating Adam Bonn 11 to 7 in the final game.

Meyers of Taber went home with the International Coal and Coke Company Limited cup after defeating Maffoli of Fernie 12 to 10 in the final game.

The annual meeting and banquet was held at the Turtle Mountain Playgrounds on Tuesday.

President William Kerr presided and kept the program flowing nicely. The minutes of the year's operations were read and adopted.

W. Chisholm was elected president for the 1948-49 term with E. Gibbs as secretary.

A special invitation was received by the members of the Crows Nest Pass Curling Association to attend the Taber bonspiel next season. This invitation was readily accepted by many members.

The invitation of the Fernie Curling Club to hold the 1949 bonspiel in Fernie was accepted.

ORDER SUPPLIES NOW FOR CHILDREN'S APPEAL

National headquarters for the Canadian Appeal for Children report that many communities in isolated areas—lumber camps, mining districts and scenes of lumbering operations—are without means to contribute to the Appeal.

A. B. MacDonald, chairman of the national committee for the United Nations Appeal for Children and leading figure among the co-op groups sponsoring the campaign, has issued a statement requesting that such areas which are now without facilities for contributing to the Canadian Appeal for Children communicate with national headquarters, Canadian Appeal for Children, 139½ Sparks Street, Ottawa, and instructions and supplies will be sent.

"It is amazing the number of communities which seek to assist the Appeal and are without means to do so", Mr. MacDonald said. "This Appeal means unique opportunity for children of the world who will be citizens of tomorrow. We must save them. They must be fed, clothed, given medical treatment and given a chance to become educated. People in all walks of Canadian life realize the urgency of the Appeal and are anxious to assist. Please, if there are any communities which wish to help, advise us and supplies will be sent."

FAREWELL PARTY

A farewell surprise party was held on Monday night for Mrs. Frank Paterson by about a dozen of her friends.

The party was held in the home of the honored guest with games being played throughout the evening. Mrs. Paterson was presented with a glamor pin and several handkerchiefs by Mrs. J. Kinnear for which she was sincerely thanked by the honored lady.

Neighbors of Mrs. Frank Paterson held a party in her honor last Friday night. Games and Bingo were played. The game of honor was presented with a beautiful picture of the Crow Mountain.

In The Legislature

By E. O. Duke

Through the courtesy of the Editor of this paper it is my intention to again, as in the past, bring to you each week some of the highlights of the present session. I will endeavor to give the high spots of the more important bills and the debates coming before the Members.

With more than usual color, the present session got under way on Thursday last, when the Speech from the Throne was read by Chief Justice Harvey, acting for Lt.-Governor J. C. Bowen; the Lt.-Governor was ill. The Motion to adopt the Throne Speech was moved by the Speaker, by J. C. Landryson, M.L.A. for Lethbridge, and seconded by the Member for Peace River, Mr. Wm. F. Gilliland. The Speech from the Throne forecast considerable legislation in the direct interests of the farmers of this province. It included the services of the Agricultural, Home Economics and Agricultural Service Boards. It promised the completion of the animal pathological laboratory; the extension of irrigation; and an enquiry into the feasibility of building a dam on the Red Deer river for electric power and irrigation purposes. The government is going to make a comprehensive enquiry into the cost of farm production.

Every assistance is promised to continue the search for oil in the Province in an attempt to overcome a general shortage of this much needed commodity. A survey of the natural gas picture will be made to insure that there are no exports until the supply for Alberta citizens is assured.

Three new full-time health units will be established, and a mobile mental hygiene clinic will be organized to serve the needs of the northern part of the province. Work will start this year on a new 200-bed T.B. sanatorium.

Construction and building expansion, as part of the government's five-year road program, will form a large part of this year's activities. It seems likely that increased grants for municipal road construction and improvements will be made this year.

A bill has already been introduced which will eliminate daylight saving time in the province.

The early days of the new session show the dismissal of one deputy minister. Mr. W. H. Somerville, who was in the Dept. of Economic Affairs and, at the same time, was technical adviser to the Social Credit Board. His dismissal resulted in the premier requesting the resignation of the Minister of Education, R. E. Ansley. Both these men persisted in following policies opposed to the present administration. The new minister of education will be Mr. Ivan Casey, Member for Okotoks-High River. Mr. Casey has had a good many years' experience teaching in this province, as well as business experience in High River, and is well fitted for the new post.

To Canvass For Library Books Sunday

The St. Paul's Young People's Association have taken it upon themselves to make a town-wide canvass in effort to gather books for a local library which has been for so long talked about. The young men and women of this club will begin their campaign under the direction of Frank Dunstan, on Sunday afternoon. They plan to cover all of Hilltown, including 3rd, 4th, 5th and 6th streets that Sunday and the rest of the town in sections at later dates.

The St. Paul's church club room will be used as a temporary library until such a time as the Civic Centre gets under way or a recreational centre is erected. When some other convenience is arranged the Young People intend to turn over all of the books donated so they may become of full value to the citizens.

It is asked that the citizens to have their books ready when they are called upon so as not to delay the campaign. Books required by the association are any hard covered books. Books such as the pocket type or any other soft covered ones would be of no use.

The approximate cost for highway construction and improvement in 1947 was \$19,000,000. Last fall officials of the public works departments said contracts had been awarded and various projects undertaken by the department in addition which meant the total appropriation would be spent.

While the actual figure this year will not be known until the budget is brought down, it has already officially put at around \$15,000,000.

Officials of the A.M.A. have expressed their satisfaction with the program understood to be proposed for the current year. The organization has advocated for many years the spending of larger sums on road needs and the building up of a high standard highway system.

BIRTHDAY PARTY

Mrs. H. Gate and Mrs. Wm. Shields were joint hostesses at the home of Mrs. Don McGregor on Thursday evening in honor of Mrs. Don McGregor, in the event of her birthday, and Mrs. Lorraine Kryzwy, a recent bride to Coleman.

Court whist was enjoyed, winners being Mrs. E. Kostelnik and Mrs. Alma Roughide. Following a most delicious lunch and the cutting of the birthday cake Mrs. Kryzwy was presented with a basket filled with lovely dishes from the assembled guests.

Following this presentation, a guessing contest was held, the winner being Mrs. E. Kostelnik, concluding a very enjoyable evening.

MUTUAL LIFE PRESIDENT

Louis L. Lang

President of Mutual Life of Canada, who addressed the 78th annual meeting of policyholders held at Waterloo, Ont., Thursday, February 5th.

A record of \$100,000,000 in sales of life insurance in 1947 was reported by Louis L. Lang, President, and W. H. Somerville, vice-president and general manager, at the annual meeting of The Mutual Life of Canada, held at Waterloo, Ontario.

Mr. Lang stressed the value of life insurance in combating inflation. The worldwide need for manufactured goods and raw materials has created a great opportunity to help meet that need, should mean continued activity in all spheres of Canadian life, stated Mr. Lang. Most factories are still behind with their orders. Scarcity of goods and high demand has helped create high prices. Economic conditions call for wise spending on the part of all, said Mr. Lang, effort to avoid excessive inflation with its resulting distress and disturbances. The speaker called for patience with the development of the United Nations which has made progress toward solution of some of its many problems, and he called on Canadians to remember that the Canadian dollar is the nation's real wealth and hope.

All working together under the cherished system of free enterprise, with initiative, industry, and recognition of spiritual values, Canadians would be able to meet and overcome the problems of the future whether they arise from disaster or prosperity.

CAR DAMAGED

General manager J. J. McIntyre and International superintendent William Fraser were given quite a shaking up Wednesday morning when the latter's car and a coal truck collided on York Creek road.

Mr. Fraser escaped uninjured while Mr. McIntyre received scratches to his face. The front of the car was quite badly smashed.

Organize Community Choir In Coleman

A meeting of choral enthusiasts was held on Thursday Feb. 26th in the banquet room of the Grand Union Hotel. The meeting was initiated by a number of citizens who have always taken a keen interest in singing.

Mr. F. R. Duncanson opened the meeting and explained the need for a local choral group. After some consideration of the matter the meeting agreed to form a choir, the name of the organization to be the Coleman Choral Society.

A slate of officers and executive consisting of the following members was then elected: Mr. Reuben Johnson, president; Mr. J. Emerson, vice-president; Mr. P. Merrow, secretary-treasurer; Miss E. Ewing, Marian; Miss M. Bonniak, Mrs. A. Jones, Mrs. Joan Dunstan and Mr. F. R. Duncanson, executive members.

The choir shall be conducted by Mrs. F. R. Duncanson and will practice every Wednesday at 7:15 p.m. at the school auditorium.

... V

1947 MATERIAL PRICES JUMP 20%

A survey of prices in the building materials field shows that in one department alone were prices held in check during 1947. A bulletin issued by the Economic Research Division of the Central Mortgage and Housing Corporation shows increases all across the board. Further investigation however, reveals that manufacturers' prices for asphalt roofing, which represents 80 per cent of the requirement for roof surfacing, showed no increase during the year and has experienced only a 15 per cent increase since 1939.

The removal of office controls from building materials last year brought about a jump in prices of over 8 per cent in the single month between September 15 and October 15.

Wholesale prices of building materials for the first ten months of 1947, states the bulletin, averaged 20 per cent higher than in the twelve month period of 1946, representing a rapid price increase since 1937 when the annual index of building material prices was 20 per cent above the 12 month average for the previous year.

Coleman Curlers Top Lions Spiel At Bellevue

Pattison Rink Wins With 44 Points; 18 Rinks In Action.

The Bellevue Lions played host to 18 rinks from Macleod, Pincher Creek, Bellevue, Blairmore and Coleman on their artificial ice rink.

Local Lions club skipper bobbed Patterson captured the Grand Aggregate with a total of 44 points bringing each of the players a lovely pocket cigarette lighter. Players on the winning Coleman rink were R. Patterson, A. Abbott, H. Allen and J. Martin.

The hosts served a beautiful buffet luncheon to the curlers in the Catholic Hall in Bellevue. The bonspiel was an invitation on the part of the Bellevue Lions and served as a medium of excitement and thrill for all the curlers.

Red Cross Grant \$10,000 To Aid Rheumatic Sufferers

A measure of new hope is offered to some 600,000 Canadians suffering from arthritic and rheumatic diseases with the formation of a Canadian Arthritis and Rheumatic Society, assisted by an initial grant of \$10,000 from the Canadian Red Cross.

Under the auspices of leading medical authorities in medicine, the new society has as its objective: to promote a program of prevention, diagnosis, treatment, training of personnel, research and public education in matters pertaining to the disease in 200 forms.

The Red Cross grant represents one of the first stepping stones in a long program on behalf of rheumatic sufferers. A further sum of \$10,000 will be made available by the Red Cross in the near future.

In commenting on the formation of the Canadian Arthritis and Rheumatic Society, Dr. Paul Martin, Minister of National Health and Welfare, expressed his appreciation of the Canadian Red Cross Society's grant as an aid to the efforts of the federal and provincial governments in organizing and establishing this voluntary organization.

"The extent of the problem is tremendous" Mr. Martin said. "Although very little recent survey work has been done as yet in Canada, the U.S. Public Health service has stated that of all diseases, arthritis and rheumatism rank first in prevalence, second in temporary disability and third in chronic disabilities. Recent figures from Massachusetts show that there are more cases of chronic rheumatism today than heart disease, tuberculosis and cancer combined. The toll in pain on the part of the rheumatic sufferer is incalculable."

"In England and Wales, economic damage in sick pay, lost wages and cost of medical treatments is estimated to be more than 25,000,000 pounds a year."

Mr. Martin emphasized the need for intensive research as to the causes of the disease. He pointed out that diagnostic and treatment centres are "woefully inadequate in Canada."

"Early diagnosis were made and appropriate known treatments applied promptly, there would be a high percentage of recoveries as well as a great reduction in present serious crippling of patients suffering from the disease," he said. "There is urgent need for the development of such centres."

As soon as the Canadian Arthritis and Rheumatic Society is fully organized to cope with this tremendous national problem, I feel sure that both the federal and provincial governments will support the program," Mr. Martin concluded.

The two Red Cross grants are directed at assisting the new society over its first hurdles, until other financial support can be forthcoming.

Aid in medical research and pioneering in the field of public health are among the many services for which the Canadian Red Cross is asking \$3,000,000 next month—work for the improvement of health, the prevention of disease and the mitigation of suffering throughout the Dominion.

CARD OF THANKS

We wish to thank our many friends who gathered at the home of Mr. and Mrs. A. Cameron on Saturday to wish us success in our new home. We especially wish to thank those who could not attend but helped toward our beautiful gift.

GRACE and JOHN STORM

Canada's Resources

IT IS APPARENT THAT CANADA'S vast wealth of undeveloped natural resources is assuming increasing importance as a source of raw materials, on this continent since present supplies of oil, minerals, and forest products do not now give promise of meeting the growing world demand for them. Although there are extensive developments here in mining, forestry and oil production, there are still great areas which have yet to be opened up, and when this is done, it will affect Canada's future in many ways, providing new fields of employment and bringing increased activity to the industrial and economic life of the country. Although extensive development is not expected to take place in the immediate future, it is inevitable that Canada's rich store of natural resources should, in time, be brought into use, and already geologists, prospectors and engineers have made preliminary surveys of lands considered likely to yield valuable raw materials.

Rich Deposits In Labrador

The results of their work are likely to prove of the utmost importance to Canada, and to the industrial life of the whole continent. At present the richest source of iron ore in North America is in the north-central United States, but these fields are said to be nearly exhausted. As they cease to yield iron ore, it is expected that the iron and steel industry will gradually move to the eastern coast, and that the deposits in Labrador will become the chief source of raw material for the industry on this continent. Recent surveys have also been made of the area bounded by Yellowknife, Hudson's Bay, the Manitoba boundary and the Arctic Islands, and it is expected that valuable mineral deposits will some day be developed in that territory.

Interest Shown In Oil Fields

Increasing shortages of oil supplies on this continent have directed attention to the Leduc oil fields in Alberta, which gives promise of ranking as one of the most productive in North America. There are also possibilities of some day producing oil in quantity from the tar sand deposits in northwestern Canada. In forestry, and the production of pulp and paper Canada is also expected to expand in the future, although these industries have already been highly developed in this country. Advanced methods of lumbering, and of processing in the pulp and paper industry, as well as greater utilization of waste products, are now contributing to greater output in these fields. The fact that Canada has a small population in comparison to the extent of the country, and also to the fact that our natural resources are farther removed from the centres of industry than the great mineral and oil deposits in the United States, have retarded the opening of many of our richest areas. It now appears, however, that we are about to see some of these areas developed, and it is to be hoped that such developments will be carried out with wisdom and in a manner which will be of benefit to the people of Canada and to industries both here and abroad.

Trapper Captures White Wolf After Struggle In Snowbank

FORT ST. JOHN, B.C.—Struggle to take a huge white timber wolf alive was told here by Leah Callison, Fort Nelson trapper. Callison found the ferocious beast in his trapline west of the Alaska Highway.

The wolf, its forepaw in the jaws of a trap, tried to free itself when the trapper approached. Noting its size and strength, Callison decided to take the wolf alive with a hope of cross-bred the animal with his Mackenzie River Husky dogs.

He took the huge animal by its gant fangs and made it fast to a tree. He then roped the wolf's front paws and tied the line to another tree.

Getting a dog muzzle, Callison

closed in and grappled with the wolf. He seized a fistful of the beast's mane, hugged the animal down into a snowbank and managed to slip the steel muzzle over its fangs and jowl. The wolf was towed behind a dog team back to Callison's cabin.

PROSPECTOR SAYS ALASKA STILL HAS GOLD

ERIE, Pa.—Harold Eide, Alaskan prospector, believes there still is "gold in them hills" for the sordid who can withstand the rigors of Arctic weather.

Eide, a Norwegian, told an audience here that Alaskan gold fields "barely been scratched," while untapped oil oozes to the surface in other areas.

Eide warns against over-optimism, however. For instance, he said, he spent 18 months alone in waste country before he found a shaft.

Eide also warned potential prospectors that Alaskan economy is based on the pocketbook. He estimated prices there to be about 40 percent higher than in the United States.

The palm tree is so named because of a fancied resemblance of the leaves to the outspread hand. The name means "palm of the hand."

GOT A HEAD COLD? Believe Dry, Stuffy Nose FAST!

A few drops of Vicks Va-tro-nol in each nostril will fast right where trouble is! Va-tro-nol opens up cold-congested breathing passages and relieves sneezing, stuffy nose, and chest distress. Follow directions in package.

YOU WOMEN WHO SUFFER HOT FLASHES then FEEL CHILLY-

Here's Good News!

Are you between the ages of 38 and 52 and going through that trying functional "middle-age" period when you are "hot"? Do you feel you suffer from hot flashes, feel clammy, so nervous, irritable, weak?

Then take Lydia E. Pinkham's Vegetable Compound. It contains 16 "symptoms" it's famous for this!

Many wise "middle-age" women take Lydia E. Pinkham's to regularly to help build up resistance against this disease.

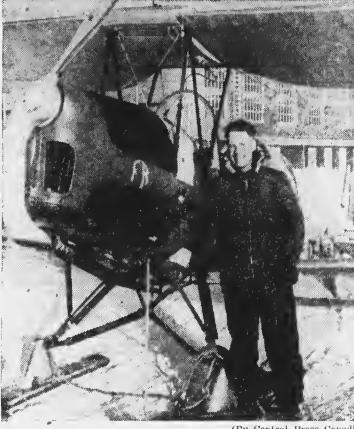

Lydia E. Pinkham's compound contains no opiums—no habit-forming drugs.

Lydia E. Pinkham's VEGETABLE COMPOUND

It helps "soothe" you know what we mean. The great medicine also has what Doctors call a "stomachic tonic" effect.

NOTE: Or, for more information, write Lydia E. Pinkham's TABLETS or VEGETABLE COMPOUND.

Prairie Town Has Flying Clergyman

By Central Press Canadian

REV. M. E. KIRKPATRICK BESIDE PLANE HE USES

Moore Jaw, Sask.—Fairland has its flying discs and the United States has its flying discs, but Saskatchewan has a flying parson, and he is, Rev. M. E. Kirkpatrick of North Battleford. The flying missionary is a member of the faculty of the Shaw Orphanage and School, which is located in the prairie town and the province in his own Tiger Moth plane, (pictured above) preaching a non-denominational gospel on behalf of Global Missions. The orphanage recently dispatched missionaries to South Africa and North China. Besides caring for an average of 20 homeless children, the orphanage operates vocational schools and gives instruction in flying, and other subjects.

Kirkpatrick, who came from Moore Jaw in wing and a prayer, after a harrowing experience in a blizzard over the Cypress Hills, hopes to visit the Arctic Circle soon, along with a fellow minister, to explore the area around the Mackenzie River and do a little missionary work among the native Eskimos. They will travel in the Tiger Moth, which is equipped with skis.

FUNNY And OTHERWISE

He was celebrating his seventieth birthday and the neighbors had gathered round.

"Don't you hate to grow old?" one of them asked the aging man. "No," he snapped back. "I wasn't old I'd be dead."

She was congratulating Mary on her driving ability: "Why, you're handling the car like a veteran."

"How do you know?" countered Mary. "You've never seen me handle a veteran."

Two buck privates returning to camp from an evening in town paused by the roadside to look at a dead deer.

"It has two sets of antlers, so what is it?" said one.

"That's the question," said the other. "It's either a skunk or a corporal."

The scene was a tense one in the motion picture drama. The audience sat enthralled. Suddenly the husky hero turned and slapped the heroine in the face, a resounding slap.

In the stunning silence that followed, a little voice piped up:

"Say, Mom, why doesn't he hit her like back you do Pop?"

Wife (paying an unexpected call at the door): "You told me, John Henry, that your new stenographer was an old maid."

Employer (fustered): "That's right, my dear; she's away, ill today, and sent her granddaughter instead."

"Poor Man! He was ruined by untold wealth."

"Untold wealth?"

"Yes, he didn't tell about it on his income tax returns."

"You must think I'm a perfect idiot!"

"Well, perhaps not perfect, but you're doing quite well."

Friend—It's too bad Clarence and Dorothy aren't good enough for each other.

Man—What makes your say that?

Friend—Oh, I've been talking to both families.

Speed Friend: "It's great speed along like this. Don't you feel glad you're alive?"

Passenger: "Glad isn't the word. I'm amazed."

There are a lot of things a gardener can do before the ground is ready for planting, and it is not a bit too early to start doing them. There will be plans to make, seed catalogues to get, tools to buy and supplies to be ordered. It is not too early, either, to start looking around for damage, to see what shrubs and flowers have come safely through the winter, to make a note of gaps to be repaired.

In this preparatory work, planning for the coming season is the most important and probably the most pleasant. A good seed catalogue will help. In the spring, found important plants about hardening off, the time of blooming or, in the case of vegetables, time of maturity. Remembering these facts will help prevent mistakes, such as planting small things before larger ones, getting big vegetables crowded too close together, or having clashing colors in long intervals when there is no bloom at all.

By noting carefully the time of blooming or the maturity of days to maturity, it is possible to plan and create flower gardens which will bloom continuously until frost, and a continuous supply of the very freshest vegetables. In both cases in addition to using early maturing and late varieties, it is also advisable to plant several times, say, once a little ahead of normal, then normal, then later than normal. This will spread out vegetables and flowers, too.

As Soon As Possible

One of the first steps to be soon taken in the spring is to plant.

They should go in just as soon as soil can work.

They are best planted in a foot deep trench into which has first been put about three or four inches of well rotted manure, or some finely pressed straw with a little manure top.

Gradually the trench will fill in and a deep, drought-resistant root growth is developed. Later on some brush or strings should be provided for support. Frequent picking of flowers will assure a good return.

Gradually the trench will fill in and a deep, drought-resistant root growth is developed. Later on some brush or strings should be provided for support. Frequent picking of flowers will assure a good return.

WORLD HAPPENINGS BRIEFLY TOLD

A new high this year for ships in port to take in, was recently set at Vancouver when an even dozen ships were in harbor. In addition one ship was loading at the New Westminster House.

China's national currency touched an all-time low as runaway inflation sent black market quotations for United States dollars up to 225,000 Chinese dollars.

Winston Churchill said that the British government and the Labor party had declined invitations to a meeting of the "United Europe" movement. The conference will be held at The Hague May 7-10.

The senate foreign relations committee voted unanimously to cut off Marshall plan aid to any European nations which fail to boost their own production.

Sir Stafford Cripps said Britain's debt to the United States Dec. 31, "apart from indebtedness arising out of the 1914-18 war," was \$4,235,000.

Distributing their three sets of twins among relatives at Quincy, Mass., Mr. and Mrs. John J. Walsh went to New York, appeared on a quiz program on the radio and returned \$615 richer.

The spire of St. Peter's Goldring parish church was removed because of wartime activities, each stone was numbered and laid away. Last year it was rebuilt in record time.

Holand is to receive 300,000 tons of British coal under the new \$200,000 Anglo-Dutch trade pact.

Newest Crochet

Alice Brooks

To make your furniture look its loveliest, this chair-set! Birds, crocheted in simple pineapple design, make a handsome set.

Crochet rewards you with its lasting beauty. Pattern 7188, directions for set.

Our improved pattern—visual with easy-to-sew charts and photos, and complete directions — makes needlework easy.

To obtain this pattern send twenty-five cents in coin (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper, 1917 McCreary Avenue, Winnipeg. Be sure to write your name, address and pattern number.

SELECTED RECIPES

SCOTCH BROTH

3 pounds mutton from the neck
2 quarts cold water
2 tablespoons salt
1 sliced carrot
2 sliced onions
4 sliced celery
4 tablespoons barley, soaked overnight

Remove the skin and fat from meat that has been wiped with a damp cloth. Cut the meat into pieces, put into a kettle and add the water. Heat gradually to boiling point, skim and cook about 2 hours, adding vegetables at the end of the first hour. Strain, cool and remove any fat. Boil the barley, add barley and cook until the barley is soft. The meat should not be thrown away, but used in stews, croquettes, or meat cakes. If combined with a little broth, the flavor is restored.

SCOTCH GRIDDLE CAKES

2½ cups flour
½ teaspoon salt
1 egg
2 cups sour milk
1½ teaspoons soda
1 tablespoon fat

Combine all dry materials and sift. Beat eggs, milk and melted fat together. Add sifted dry materials and beat thoroughly. Place batter in a pitcher. Pour on a hot, greased griddle.

Institute Reports Progress In Its Research For Cancer Cure

PHILADELPHIA.—Mice have been immunized against some forms of cancer, Leavenworth Hospital's institute for cancer research disclosed. A human blood test to detect the disease has worked in at least one case.

The developments in fighting the second most deadly disease in the United States were reported as the American Cancer Society gave the institute \$100,000 for research directed towards a cure.

But Dr. Stanley P. Reinhart, institute director warned: "We must

guard against raising false hopes." The immunization work has been done with bacterial polysaccharides—a group of starches—the institute disclosed.

It also disclosed it has been experimenting with teropterin, a folic acid derivative which has growth-control powers.

Both polysaccharides and teropterin have been used on human patients. The folic acid derivative relieves symptoms of cancer and is a pain killer.

Detection of cancer through a blood test was accomplished for the first time only a few weeks ago, another institute scientist, Dr. Gal Miller, reported.

Dr. Miller said the patient had been examined by X-ray and cancer was not indicated.

Then a test was made by passing an electric current through blood samples.

Dr. Miller described the test as "electrophoresis," a process which causes proteins to migrate to the negative and positive electrodes under the influence of an electric current.

I.O.D.E. PURCHASE FILM OF ROYAL FAMILY

The Imperial Order Daughters of the Empire, for the second time within a few months, has purchased basic prints of a film of the Royal Family. This announcement was made at a meeting of the Belleville Weekly Intelligencer, I spent hours poring over the old advertisements.

Right at the top of page one, in the best place on the paper, right beside the lead about Sir John, is an ad. for Ball corset. This catches your eye because there is a drawing of a tugger tossing three balls in Sir John. No mention of the corset, but this is the ad.

"It's easy enough—the Ball corset. That's because it has coils of fine wire springs in the sides. They clasp the figure closely, but yield to every motion. They 'give' but they come back. So does your money if you've worn a Ball corset two or three weeks and find you don't like it."

Fair enough. Thinking of being enclosed in coils of fine wire springs?

You could buy dress muslin, fast colors, for 10 cents a yard. A yard was eight cents a pound, butter 14 to 20 cents a pound, eggs 10 to 12 cents a dozen, potatoes 80 cents to \$1 a bag, chickens 10 to 80 cents a pound, bacon 75 cents, turkey 50 cents to \$1.50. The market for fat cattle was considered good at 4% to 5 cents a pound. Dressed sheep were from \$3.20 to \$5.50 each. Sheep had been sold for 20 cents a pound.

Fair enough. Thinking of being enclosed in coils of fine wire springs?

You could buy dress muslin, fast colors, for 10 cents a yard. A yard was eight cents a pound, butter 14 to 20 cents a pound, eggs 10 to 12 cents a dozen, potatoes 80 cents to \$1 a bag, chickens 10 to 80 cents a pound, bacon 75 cents, turkey 50 cents to \$1.50. The market for fat cattle was considered good at 4% to 5 cents a pound. Dressed sheep were from \$3.20 to \$5.50 each. Sheep had been sold for 20 cents a pound.

Wouldn't you wonder why everybody seemed to have consumption or the itch, or rheumatism, when food was so plentiful, and so good? No body ever got killed by a motor car in those days, although there seemed to be the odd murder back on the side roads.

Even if you didn't have a car, you could buy a top buggy for \$65; but what really got them—slept was a Gladstone. The newest thing in a carriage. The seats, which work automatically, can be changed from a two to a four-passenger vehicle by lowering the front end. It is particularly designed for a ladies Gladstone and the novelty, combined with its stylish appearance and compactness, makes it a great favorite."

This firm also had some new phonographs and road carts.

The C.P.R. advertised an excursion to Manitoba and all points in the Northwest, leaving on June 9, \$28 return, good for 40 days. That really wasn't so cheap. My father went West for \$10 in '98.

Those days, according to the book were "a dress of cream cashmere and a handsome pair of white kid slippers."

Life seemed to have no complications in those days. With all the butter and eggs you wanted, with cheap clothing and a buggy for \$65, with the good Queen sitting firmly on her throne, no wonder the country dreamed the long days away. Little knowing that right in front of them was a succession of wars—the atomic bomb, the Communists, the butter seventy-five cents a pound!"

China To Get Canada Wheat

WASHINGTON.—The administration's China aid programme provides for the purchase of approximately 420,000 bushels of Canadian wheat and 67,500,000 pounds of Canadian flour.

Purchases in Canada could not begin earlier than July 1 because of the current world wheat shortage. New crops after that date, the department said, should prove ample to meet China's requirements.

Wheat for the \$130,000,000 China programme also will be purchased in the United States and Australia.

About three-fifths of the proposed Canadian wheat and flour is programmed for the July-December period. The remainder is scheduled for purchase between January and June 30, 1949.

MAN WITH LONG SLEEP WILL NEVER WAKEN AGAIN

FRAMINGHAM, Mass.—The long sleep that began for Ralph C. Abbott, 32, over a year ago, continued today and doctors said he never will awaken again. On the first day of his automobile strike a tree and he was buried against a stone wall. Surgeons reported that damage to his brain governs voluntary motion, consciousness and the emotions was past repair.

DOG SURVIVES 37 DAYS IN WELL—Well at Perth, Ont., held dog 37 days until Stewart Moodie (above) went down on ropes to rescue him. From 53 pounds, Nigger starved to 17 pounds. He is said to have lived on water. Well was 70 feet deep. Experts say 37 days without food is a record, as the dog survived.

Sask. University Fees Increased

SASKATOON—University student fees have been increased \$20 to \$100 in the first move of the board of governors of the University of Saskatchewan to remedy the \$179,595 deficit in university operations this year.

The new scale of fees will go into effect after July 1.

This was decided, Dr. J. S. Thomson, president, announced at a meeting of the board of governors.

The greatest percentage increases occurred in the college of medicine, and in the school of agriculture, where fees were boosted 100 per cent.

Next fall, when students make their annual visit to the bursar's office, medical students will have to pay \$275 instead of \$175 while students enrolled in the school of agriculture will pay \$100 instead of \$20.

The reason for the increase is the sharp rise in costs of maintaining the university," Dr. Thomson said. "All costs have gone up—material, equipment, heating, lighting, wages and salaries. The board of governors has not resolved that fees must be increased if the university is to carry on its work."

In Africa there is a small plow which picks the teeth of crocodiles, the reptile allowing the bird to enter its mouth unharmed.

Thirty Seismograph Parties To Work In Alberta By Spring

EDMONTON—It was announced here that as many as 30 seismograph parties will be working in Alberta by late spring. The parties will cost approximately \$45,000 a month to maintain.

It is estimated that a major part of the \$28,000,000 to be spent in a search for oil in 1948 throughout the Dominion will be spent in Alberta.

The seismograph programme alone will employ about 800 highly-trained experts, geologists, engineers, geophysicists, power men, drillers and computers.

Seismographs have long been used to record earthquakes but seismologists searching for oil follow a complicated routine. They set off man-made earthquakes in order to find rock traps beneath the surface.

The theory is that by exploding a charge of dynamite perhaps a hundred feet down they can set up shock waves.

The shock waves bounce off each layer of rock below and a nearby sound truck records them as they work.

The Life Of A Country Editor

Saskatchewan weekly journalism is still robust.

After reading it, country editors all over the province—and some printers on the dailies—will appreciate the feelings of Editor Bert McKay as he sat down to write this story for his World Spectator at Moosemin:

"The office staff had a generous cutting of pi to handle last week, on the morning of paper day, and the effect was not pleasant. We don't mean pumpkin pie, or pear pie, but printer's pi."

"In other words, the front page shot off the press and crashed in a shuddering heap on the floor. After saying 'tut tut' and goodness me, we started in to mend the damage."

"That front page was shoved off the floor into a basin, where it was washed, soaped and put back in place, a mending operation of days."

"A new front page was put up, with all members of the staff going all out. We had the paper back on the press by two-thirds and just then the folder went on the friz."

"While we fixed it, we ran off about 1,000 papers. Just as we started the folder, the power went off. So we folded a thousand or so by hand—how would you like to cut your crop with a scythe?"

"Finally the power came on, the paper went to the post. If your paper was late, we're sorry. Now you can be sorry for us."

Lines on long strips of photographic paper.

From these lines, gathered in repeated tests in the area, they determine location of the rock traps. There is no guarantee that the traps will hold oil but chances of finding oil are better in area of seismic highs which indicate such traps lie below the surface.

Sir Thomas More, English statesman and author (1478-1535), lived at Beaupre House, Chelsea, London. Sir Thomas is chiefly known today for his book, "Utopia".

What's the Good of UNEMPLOYMENT INSURANCE?

\$87,500,000 was paid from the Unemployment Insurance fund to unemployed Canadians from September 1, 1945, to October 31, 1947.

\$31,000,000 was contributed to this fund by the Government of Canada.

500,000 individual unemployed workers and their dependants benefited from these payments.

In many cases had payments not been available the unemployed would have suffered want!

What's the good of Unemployment Insurance?—Can there be any doubt!

Unemployment Insurance helps the employer by providing unemployed with purchasing power; and helps the worker by providing maintenance allowances during unemployment. Employer and Employee and the Government all have an interest—Unemployment Insurance is a large factor in a healthy National Economy.

Make full use of your local office of
the National Employment Service.

HUMPHREY MITCHELL, Minister of Labour
A. MacNAMARA, Deputy Minister

ONE PRACTICAL FORM OF ENCOURAGEMENT

(Calgary Herald)

Teachers may not deduct summer school expenses or convention expenses for income tax purposes. So Dr. J. J. McCann, Minister of National Revenue, informed a questioner in the House of Commons last week. The minister gave no indication that a change in policy was likely. But such a change, in our opinion, is long overdue.

We are not disposed to argue particularly over convention expenses, but we certainly think that teachers should be allowed to deduct their summer school expenses when making out income tax returns. In many cases they are forced to attend summer school if they wish to remain in the profession. Holders of elementary or intermediate certificates, for example, must attend at least one summer session before their certificates are made permanent. This additional instruction—and expense—certainly benefits the community quite as much as it does the teacher.

The average tuition fee for each taught at summer school is about \$15, and most students take at least two courses. To this must be added numerous other fees, and the much larger item of room and board, which would be at a minimum, \$60. In all the summer school student is fortunate if his or her outlay is under \$200.

There are certain compensations for attendance at summer school, but they are not always immediate, and do not offset entirely the cost of instruction. A Calgary teacher, for instance, receives an increase in pay of \$10 a year for each year of university training completed, and the same increase for obtaining a degree. But it should be remembered that it takes three years of summer school to entail one year of university training.

Teachers are also unfairly treated when it comes to buying books, which are in a real sense tools of the trade. Being of a technical nature, they are generally expensive, sometimes running as high as \$10 and \$15. But not for them.

If the average teacher's salary in Alberta were high, or even in line with the skilled trades, the question of deductions might be overlooked. But they are not high. In rural areas, they are sometimes barely sufficient to meet day-by-day expenses. Consequently, any additional compulsory expenditure is a serious item in the teacher's budget. Added to this is the fact that the teacher student cannot take summer employment while attending classes. Thus a modest source of revenue is denied.

At present there is a shortage of qualified teachers—such a shortage, in fact, that the provincial government has had to offer additional inducements to teachers-in-training. But why should not the qualified, or even semi-qualified, teacher who is desirous of improving his or her academic standing not be given some encouragement also? Permission to deduct these costs for income tax purposes would be one practical form of encouragement.

—V.—

The Canadian Appeal for Children will not turn the world overnight into a brand-new shiny place to live in. But it WILL give food and clothing to thousands of children who are tomorrow's citizens. Give your share NOW.

The cure for cancer may lie in the mind of a boy or girl who is growing up in one of the destitute countries of Europe. Help, help, without schooling. Give to the Canadian Appeal for Children and keep these potential leaders alive and healthy.

**Are You Free to Choose
When, Where, and to Whom
You Shall Sell Your Wheat
AND AT WHAT PRICE?**

The Answer is—NO!

If you are satisfied to sell it to the Wheat Board at a controlled price, about one-half of what you would now get for it in a free open market, well and good.

But if you want to sell your wheat on a free and open market and get a much higher price than the Wheat Board pays, why should the Government stop you?

Freedom of choice should be yours as to when, where, to whom and at what price you shall sell. Do you have it now?

Why should prairie wheat growers be compelled to pay the whole cost of subsidizing cheap wheat for Britain as well as cheap wheat for home consumption? These subsidies should be paid by the Government, that is by all the people and not loaded on to wheat growers alone.

You are compelled to pay high prices for everything you buy. Why not then pay high prices for your wheat?

Why not if some farmers are satisfied with a low price for their wheat, why should they and their leaders stop you from getting high prices for your?

Do you realize how you are now controlled and regulated by the Canadian Wheat Board Act and its Amendments? If you don't, send at once for the pamphlet which gives you the facts.

Mail the coupon below and DO IT NOW.

To The Winnipeg Grain Exchange,
Winnipeg, Manitoba.

Please send me the pamphlet explaining how I am
regulated and controlled by the Canadian Wheat Board Act and
its Amendments.

NIGHT JOURNEY -

Mothers rise at dead of night
In fear of blankets not quite tight
"I think I heard a sound" they'll say,
And softly move across the way

To stand by children breathing deep.
(*Now I lay me down to sleep*)
And smooth the ruffled strands of hair . . .
Tonight, when you are watching there

Think on THESE . . . on children's faces
In the bitter, barren places,
Where those other mothers stay
In aching vigil; while they pray
"Not tonight, Lord. Pass him by!"
(*Now I lay me down to sleep*)
Can YOU sleep, who hear their cry?

True reports on the works of the Red Cross
by leading Canadian writers

The case of the 7 strangers

by Claire Wallace

There is a man in Canada who has the blood of seven total strangers in his veins. Maybe you wince at that. He doesn't. Without it, he would die.

Two years ago he was seriously injured in a crash. He received desperate head injuries, and a delicate operation was imperative. But shock and loss of blood had so weakened him that he couldn't have survived on it. If, seven strangers had not stepped in.

They were Canadian men and women who had each given a blood donation to the Canadian Red Cross Blood Transfusion Service. When the doctors called for blood to save the life of an accident victim, it was the blood of those seven which pulled him through.

"Were you one of them?"

Today, he is a healthy, happy, useful citizen of Victoria, British Columbia. The only thing that marks him as a stranger is the averaging man is a rather searching look that sometimes comes into his eyes as he walks along the street. For he often thinks of the seven who saved his life and wonders

who they are. As he looks into a stranger's face, he silently asks: "Do I look like one of you? I thank you from my heart."

Similarly, the mother who gave birth to twins and would have died except for blood transfusions, the baby so anaemic at birth he could be kept alive only by donated blood . . . the maimed . . . the sick . . . the old—these three owe their lives to blood transfusions.

Thanks, unknown friend."

Free blood for Canadian hospitals. The Red Cross Blood Transfusion Service plans, as soon as possible, to extend whole blood and plasma *free* to all patients needing it, in hospitals across Canada. Alberta, British Columbia, and Alberta—provide this life-saving service. Last year, Alberta and British Columbia distributed 21,044 bottles of whole blood and 2,364 bottles of plasma, resulting in the saving of many lives.

But it takes money as well as blood to keep the service running. Remember this, as the Canadian Red Cross appeals to you now for funds. Give generously. A life may depend upon your donation.

Red Cross Services include: Blood Transfusion, Outpost Hospitals, Aid to Sick and Disabled Veterans, Treatment for Crippled Children, Disaster Relief, Nutrition Services, Home Nursing Courses, Swimming and Water Safety, etc.

LOCAL NEWS

Wm. Balloch, of Taber, is spending two weeks holidays with family members.

Miss Eileen Fry, of Vancouver, arrived home last weekend and will spend a month's vacation with her parents, Mr. and Mrs. A. Fry.

Fourteen members of Summit Lodge, A.F. & A.M. No. 30, and five members from Blairmore Lodge chartered Clae's bus on Tuesday evening and travelled to Pincher Creek where they spent a most enjoyable social evening with members of Splitzite Lodge No. 6.

CARELESSNESS KEEPS HOME FIRES BURNING

Prospects of a fire loss from stoves and furnaces are greatest during late winter and early spring, according to Dominion fire authorities. They also note that each winter brings a toll of casualties from carbon monoxide the deadly gas, colorless and odourless, which gives no warning.

Homeowners should make a systematic check-up of their heating equipment before a fire or injury occurs, they urge. Check the chimney—all joints should be tight and a spark arrester should protect combustible roofs. If possible, have the combustible roof surfaced with metal, tile, or fire-resistant asphalt material since roof fires account for the greatest number of home disasters. Soft pipes should be kept in poor condition and a safe distance from combustible walls, ceilings, curtains or papers, and firemen recommend use of a metal floor covering under wood or coal stoves.

Asches must be kept in metal containers for maximum safety, they advise, and don't take chances on gasoline or kerosene to start a fire.

Other suggestions the fire authorities propose are to be sure that the damper in a stove pipe is never closed enough to force gases out into the room. It is better to regulate "draw" with a check draft. When fire guard action is completely stopped, the flames by adding coal to one side of the fire pot. Sleeping quarters should never be with out some ventilation at night.

THEATRE NOTES

SONG-FILLED FILM AT BELLEVUE SAT. AND MON. "Love and Learn", a romantic, danceable, song-filled Warner comedy based on a story by Harry Sauber, is the new film scheduled to open Saturday at the Bellevue Theatre. The cast includes stars Jack Carson, Robert Hutton, Martha Vickers and Janis Paige, with Otto Kruger, Tom D'Andrea, Angela Greene and Herbert Anderson featured.

KID STAR WANTS TO BE "HOT PILOT"

"Butch" Jenkins is showing a slight aptitude for bicycle these days. He was given his first airplane ride recently by author Morton Thompson who wrote the story of the young actor's current M-G-M picture, "My Brother

Talks to Horses," playing Saturday and Monday at the Orpheum theatre.

Thomas, an experienced pilot, said that "Butch" took to the air like a veteran.

"I'm not gonna be a fireman when I grow up," decided "Butch", after his first flight. "I'm gonna be a hot pilot."

World News In Pictures

TO THINK IT SHOULD COME TO THIS — So the butcher leans over the counter and gives you — free — some hamburger, or several slices of ham. Then he hands you a dime for carting it away. Then you wake up? No, you don't, if you chanced to be near St. Helena, Ore., during the peak of an almost incredible meat war. It began when a new butcher shop opened in the town, selling hamburger at 35 cents a pound. Competitors dropped the price to 29 cents, and then decided to give it away, together with 35 hams. As things cooled off, it went for three pounds for \$1, pot roast at 99 cents, and steak 41 cents. Townfolk are shown cashing in on the bargains at one of the butcher shops.

ROCKEFELLER CUT THEIR WEDDING CAKE — Winston Churchill and his lovely bride combine forces to pass the cake after their wedding in Palm Beach, Fla. In spite of delays and a race with Friday the 13th jinx, the rockefellers began married life in high spirits. The Cinderella-Prince Charming romance, which started the country, culminated in a quiet ceremony at the home of Mr. and Mrs. Winston Guest in Palm Beach.

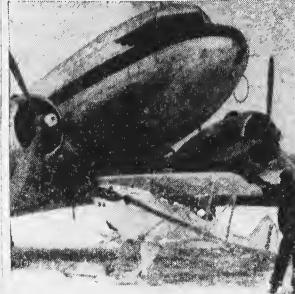

NO MINK FOR HER — Usual hallmark of Hollywood success, a mink coat, will be torn off by Colleen Gray, who has just finished her third top role since her film discovery. The young star, who earned \$15 to \$25 a week running switchboards, waiting on tables and other odd jobs, says: "I'll never own a mink. After you've done a month and made your way through college, you want to save money when you get some you can save. When she and her husband save up \$5,000, they intend to buy their first car."

LIGHTHOUSE KEEPERS VISITED BY HELICOPTER — Stranded a month by gale-lashed seas, three men are still in this Wolf Rock lighthouse at Penzance, England. The mighty waves have been breaking half way up the 110-foot tower, defeating attempts to get supplies in until a helicopter was used.

PREVIEW OF SPRING FLOODS BITES ONTARIO — "Leave your cars at home" was the warning to Ontario motorists after a week-end's heavy rains, which resulted in small floods in some parts of the province. Driving conditions were predicted to be the worst of the year, as the department of highways feared that puddles, such as the one through which the coach above splashes, would turn to sheer ice.

IT'S NOT A TOY — Gene Geuther of Ambler, Pa., stands beside the tiny plane he built in his spare time after he flew it for the first time on a half-hour successful test flight. The little craft, which took four months to build, has a 16-foot wingspread, 12-foot fuselage and cruises at 145-miles an hour. Its miniature size can be seen by comparison with the army transport which is behind the tiny ship.

RECOVERS STOLEN STREET CAR — A young man stole a shiny new street car from the T.T.C. (Toronto Transportation Commission) over a week-end. But Eddie Wills, (above), veteran yard man, spotted him before he could get on his way downtown. Chasing the thief, Eddie leaped over a fence and forced the man to stop to get turned around. He forced open the door, lifted the young man bodily from the driver's seat and threw him out on to the street. Police later caught the youth in the basement of a restaurant. He was promptly charged with stealing the street car.

THREE CHILDREN DIE IN FIRE, FRIENDS RESTRAIN FOSTER MOTHER — When the children died in the fire, Mrs. John Hicks, (above), comforted foster-mother. In these ruins of a cottage at Airport Beach near Pickering, Ont., three children, four and under, died while the woman who planned to adopt one of them was buying them candy at a nearby store. She was cut and burned trying to save them. Neighbors restrained her from rushing into the burning cottage.

WAR ACE BECOMES T.C.A. PRESIDENT — Combat flier in World War II, Gordon R. McGregor, of Montreal, has been appointed president of Trans-Canada Air Lines. During the battle of Britain he shot down five Nazis and shares a sixth, winning the D.F.C. and the O.B.E. in 1943 plus French, Netherlands and Czech decorations.

STUDY MUSIC WITH D.V.A. — Veteran students from all over Canada as well as England and the U.S. are studying music financed for them by D.V.A. Above are Helen Brown and Diane Hill studying at the Conservatory of Music at Toronto. Their teacher is Mary Scott, former R.C.A.F. wireless operator. It gives all those who desire it a glorious opportunity in the cultural field.

NEWFOUNDLANDERS INSIST ON RIGHT TO CONFEDERATION VOTE — Demanding confederation with Canada be placed on the ballot in the Newfoundland referendum this spring, some 49,500 telegrams and petitions are sorted by nine volunteers in St. John's. Standing at left is J. R. Smallwood, who declares the masses of Newfoundland see confederation their only chance to break shackles of monopoly on island.

FINDS \$29,500 — For 27 years Cecil Bailey, T.T.C. (Toronto Transportation Commission) conductor, has been going through his street car after each trip looking for lost items. Recently he turned up a black bag and found \$29,500 in change and cash. Bag belonged to Vivian Edwards of Toronto, who was on her way to the bank.

CHICKEN FARM FIRE CAUSES HEAVY DAMAGE — 45,000 chicken farm fire destroyed 1,500 birds and 2½ tons of feed when a brooder house, workshop, plucking machine in barn of Arthur Blake, North York, Ont., burned. Here is the flaming barn. Fire was discovered by neighbors.

OUR COMPLETE SHORT STORY—

THE SIGHTSEERS

By JACK GARLINGTON

A LOUD Steve said "the big-build-
ing's the Aquarium," but to him-
self he said "there's something fishy
about this."

Nothing looked fishy in a young
man riding around with a pretty girl
in a blue sport coupe showing her
the sights. But somehow Steve felt
ill-at-ease, as if there were some-
thing he needed to know.

He had met Helen that morning.
He was sitting in the hotel lobby
sunk in the depths of an easy chair
and the realization that Elaine—
lovely Elaine with the quizzical eye-
brows—wasn't going to come. It was
evening, and their date had been
set for eleven fifteen. Steve wondered
how to pass the weekend in a
strange town.

Then Helen walked in. She glanced
around, shyly, and 't the same
time poised.

"Are you waiting for someone?"
he asked.

"Well," she said, gazing at him
with brown eyes. "I'm looking—"

She paused, and he filled in: "Look-
ing around? I make a good guide."

"Yes," she said, definitely. "I'm
looking around."

"Good." He invited her to a seat
and introduced himself.

"I'm Steve Laramie," he said.
"Harrison's leading tourist guide." Then
he asked a few questions, to all
of which she replied vaguely. Finally:
"Wouldn't you like to see something
beside a row of synthetic marble pil-
lars and the captain of the bell-
hops?"

"Why—" she seemed undecided—
"Are you sure you're not waiting for
someone?"

"No," he said truthfully. "I'm not
busy."

As he escorted her to the car he
found that her name was Helen
Trent and that she loved to dance.
He also found that she had soft hair
and a warm voice, and a way of
looking at him like the scent of
laughter in the air.

Well, it didn't matter. She was a
marvelous companion. She didn't
talk much, laughed when he said
something amusing, and said "oh" in
all the right places.

"Harrison's the biggest inland
badminton center in the state," he
said, repeating Elaine's words of
the day before.

"Oh," said Helen.

He took her to the Cathedral, the
Old Market and the spot on the river
bank where John G. Harris, some 80
years ago, had found a buckberry
bush just like the one in front of his
Virginia home, and set up a trading
post.

He took her along the river front
and the industrial district with the
new ice-cream cone factory.

"Largest ice-cream cone factory
this side of the Mississippi," he said.

"Two hundred thousand single
comes per day," he added, "and fifty
thousand doubles."

At the War Memorial he pointed
out several of his buddies whose
names showed out from the list. Well,
several of his buddies were listed on
war memorials; did it matter that
none of them were Harrison's?

"My—said Helen, you certainly
know Harrison well. Have you lived
here long?"

"Yes," he said, "terday this park
would have been so crowded we would
have had to detour."

No, he hadn't lived in Harrington
long. Only since Wednesday, to tell

Germolene
OINTMENT

the truth. The company had sent
him out to set up a branch office,
and he had arrived not knowing a
soul.

He had fixed that, though. After
registering at the hotel he had walked
down the Main Street, and it was
then that he met Elaine. She worked
in a bookstore, and he had to buy a
dictionary before he could make her realize that he was a
person rather than a customer. Then
he made two witty remarks and col-
ored his features with lonesomeness
before a woman showed him the town.

Helen need not know that, of
course. It might make her distrust
her guide, which would be un-
pleasant to Harrison.

"Are you going to be in Harrison
often?" he asked as they stopped to
share a soda.

"Why, yes," she said. "I suppose
I will—now." And she had looked at
him with the word "now" in a way
that stopped his visions of a lonely
time in a strange town.

Then he had to leave, and he watched
the sailboats on the lake, looked
over the view from Lookout Point,
and bought cokes from a peddler by
the shore. Steve got out of the car
to shoot a goose back into the water,
but the goose reacted oddly. It hissed
like a spittoon and expanded to
almost twice its normal size. In effect
the goose shooed Steve back in
the car.

Then he glanced at Helen, and saw
her smiling at him as if to say: I'm
laughing at the joke you know and at
one you don't.

That was why as they drove out
of the park, he suggested to himself
that the Aquarium might be fishy.

"I live just around the corner," he
said as they drove down Laurel
Street. "Do you mind if I stop by
for the mail?"

"No, not at all."

He pondered the problem as he
pulled up to the curb and walked to
the mailbox. Something was wrong.
A man might go down to the drug-
store for an evening's talk, but a
woman didn't lift an eyebrow that
there wasn't a man or a plan on the
end of it.

No, Helen hadn't wandered into the
hotel lobby just to look around. Had
someone stood her up, as Elaine had
him?

Boy, he thought as he took a note
out of the mailbox, anybody that
would stand Helen must have been
petrified from birth.

"—marred—ring at the jeweler's."
He read the note by phras-
es, thinking about the broken eyes
he saw watching at the curb.

Suddenly his attention came to a
full stop.

"So I'm sending a substitute," the
note read, "my sister Helen. I'm sure
you'll like her, and maybe she'll show
you around some more. She's lived
here fifteen years."

Copy Cat

By ANNE ADAMS

A white sheep-like Sister's for little
Ms. Too! Make Pattern 4820 as a
simulated jumper with puffed sleeves,
round collar, for now. The
sunfrock is for summer!

This pattern is easy to use, simple
to sew, tested at 41. Includes
complete illustrated instructions.

Pattern 4820: 2, 4, 6, 8, 10. Size 6,
frock, 17½ yds. 35-in.; ¾ yd. con-
trast. Sunfrock, 2½ yds. 35-in.

Send twenty-five cents (25¢) in
coins (stamps cannot be accepted)
for this pattern. Write plainly size,
Name, Address and Style Number
and send orders to the Anne Adams
Pattern Dept., Winnipeg Newspaper
Union, 175 McDermot Ave. E., Win-
nipeg, Man. 2706

THE JOURNAL, COLEMAN, ALBERTA.

WOLF HUNTING IS PROFITABLE SPORT—Proud hunters are H. Hales, (centre), and his sons Loyal and John, who have two big wolf pelts to prove their prowess. The hunters shot the wolves in the Cannington area of Ontario. Government bounty on the wolves made the hunt profitable as well as enjoyable.

TINY GIRL, BIG HORN—Daddy's
big horn is a big load for three-
year-old Helen, but she seems to
think it's great. Her father, J. W. Scott, a member of
the Margate silver band, which is
entered in the national brass band
contest, wheels her along a street
in New York, in her carriage.

Suddenly his attention came to a
full stop.

"So I'm sending a substitute," the
note read, "my sister Helen. I'm sure
you'll like her, and maybe she'll show
you around some more. She's lived
here fifteen years."
